- Reports with CSV/Excel export

Technology & AI Integration

Layer	Technology	Purpose
Frontend	Next.js 15, React, TypeScript	SSR, fast page loads, SEO-ready
Styling	Tailwind CSS	Modern, responsive UI
State	Redux Toolkit + TanStack Query	Auth state, server caching
Backend	Django 5 + DRF	REST API, business logic
Auth	JWT (simplejwt)	Secure login, auto token refresh
Database	PostgreSQL / SQLite	Production / local dev
Charts	Recharts	Revenue & orders analytics
AI Layer	**OpenAI API / Claude API**	**Recommendations, search, insights**

AI-Powered Features Detail

Feature	How It Works	Benefit
Smart Search	AI understands natural language queries (e.g. 'red shoes under $50')	Customers find products faster
Recommendations	Analyzes browsing & purchase history to suggest relevant products	Higher average order value
Sales Insights	AI summarizes sales trends and flags anomalies in the admin panel	Faster business decisions
Low Stock Alerts	Predicts when stock will run out based on sales velocity	Prevents lost sales

10	**Reports with CSV/Excel export**	**Advanced**
11	**PostgreSQL production setup**	**Advanced**
12	**Swagger API documentation**	**Advanced**
13	**Deployment guide**	**Advanced**

Frequently Asked Questions

Can I customize the design and colors?

Yes — logo, colors, fonts, and branding are all customizable.

Will I own the full source code?

Yes, 100%. Delivered via a private GitHub repository.

Is the site mobile-friendly?

Fully responsive on all screen sizes — mobile, tablet, desktop.

Can you add a payment gateway?

Stripe and PayPal integration available. Ask for a custom quote.

How does the AI integration work?

Uses OpenAI or Claude API. You need an API key — setup is included.
